Languages: C#, JavaScript, TypeScript, SQL

Frameworks & Libraries: .NET Framework, ASP.NET / ASP.NET Core, React, Next.js, Tailwind CSS

Databases: Microsoft SQL Server, PostgreSQL, SSIS

Tools & Platforms: Microsoft Dynamics CRM, Visual Studio, TFS, Git, Docker, Vite

Certifications

Microsoft Certified: AZ-900 Azure Fundamentals

Microsoft Certified: AI-900 Azure AI Fundamentals

Experience

Application Engineer, Unipartner – Funchal, Madeira January 2022 – Present

- Delivered migration from legacy middleware to ePortal by implementing a .NET 4.5 transformation layer that converted SOAP messages into COBOL-compatible requests using built-in XSLT 1.0, adhering to constraints on external libraries and enabling seamless integration with a legacy internal system.
- Maintained and enhanced .NET 4.6.2 / SQL applications, resolving production issues and supporting multiple business simulators.
- Developed a backend middleware solution enabling an OutSystems team to integrate with internal systems, translating business requirements into scalable services.
- Updated and extended a FATCA compliance checker to reflect changing regulatory and business rules.
- Maintained and enhanced a Microsoft Dynamics CRM 2013 platform, aligning legacy functionality with updated business rules and processes.
- Built an IIS-hosted web application and CRM web resources to integrate with external APIs, improving management of client consent data.
- Updated and supported SSIS-based data workflows to ensure reliable system integration.
- Delivered an automated complaint processing solution, enabling file transfers to external services via FTP through a combination of CRM customizations and SSIS.

Research Assistant, M-ITI – Funchal, Madeira June 2021 - September 2021

- Assisted in benchmarking AI solutions on embedded hardware (Raspberry Pi), gaining hands-on experience with performance evaluation and edge computing.

Projects

Portfolio github.com/LuisAguiarGIT/luisaguiar-portfolio
<https://luis-aguiar-dev.com/>

- Personal portfolio website built with React and Vite, showcasing projects and professional experience.

My Fitness github.com/LuisAguiarGIT/myFitness

- Personal gym tracking app built with Next.js, TypeScript, and Prisma, used to log and monitor workout progress over time.

Education

Universidade da Madeira – Bachelor's Degree in Computer Engineering

September 2021
